

Valable pour AbulÉdu 8.08, PRO et PLM

Certaines différences (visuelles) peuvent apparaître selon que vous utilisez la version PRO ou la version PLM. Mais dans l'ensemble, l'utilisation du webadmin se fait de la même manière.

Cette liste n'est pas exhaustive et ne concerne que les imprimantes à relier sur le serveur.

Pour plus d'informations consultez <http://linuxprinting.org> ou les sites des fabricants. N'hésitez pas à leur faire part de vos demandes si aucun pilote de votre imprimante pour Linux n'était développé.

## Imprimantes reconnues

Parmi la liste des imprimantes compatibles Linux certaines sont déjà pré-enregistrées dans AbulEdu PLM. Si vous recherchez une imprimante entièrement compatible avec AbulEdu PLM, piochez dans cette liste. La première partie concerne le fichier servant de "pilote" géré par CUPS pour cette imprimante, la seconde la description de l'imprimante ou de son caractère générique comme "EPSON Stylus Color Series"
